

SYSTEM AND METHOD FOR CABLING COMPUTING EQUIPMENT

ABSTRACT OF THE DISCLOSURE

5 A system and method are disclosed for performing the
installation of cabling in a computing system. In one
embodiment, one or more configuration utilities are
employed which guide an installer through the appropriate
sequence of cable connections for a given computing
system. By illuminating various LEDs present on the
assorted computing components, an installer is provided
10 with an indication of which component and which port
should be connected first, second and so on such that an
installation results in a robust computing system.
